Relationships and Sex Education (RSE) Early Years & Primary

2023-2024

Reviewed by: Francine Turner

Next update: July 2024

1. Aims

Through our PSHE programme, we aim to provide children with the knowledge, skills and understanding they need to lead confident, healthy, independent lives and to become informed, active and responsible citizens.

At Newton, RSE is taught within the Personal, Social, Health and Economic (PSHE) education curriculum. In addition, some aspects of the RSE programme will be covered through:

- Science curriculum
- Computing
- Circle times
- Assemblies
- Stories
- PE in the context of health and hygiene

RSE is lifelong learning about personal, physical, moral and emotional development. It should teach children and young people to develop and form positive values, attitudes, personal and social skills, and increase their knowledge and understanding of how to make informed decisions and life choices.

The aims of Relationships, Sex and Health education (RSHE) at our school are to:

- Provide a consistent standard of relations, sex and health education across the school.
- Help pupils develop feelings of self-respect, confidence and empathy.
- Promote responsible behaviour.
- Create a positive culture of communication around issues of relationships.
- Teach pupils the correct vocabulary to describe themselves and their bodies.
- Provide a framework in which sensitive discussions can take place.
- Prepare pupils for puberty, and give them an understanding of sexual development and the importance of health and hygiene.
- Give pupils an understanding of reproduction and sexual development.
- Ensure that all pupils, by the time they reach Secondary school age, are well equipped and on an equal footing, to deal with the secondary RSHE curriculum.
- To provide all pupils with knowledge, skills, and attitudes that will enable them to make positive and healthy choices concerning relationships, as they grow up and deal with risk.
- Combat exploitation.

These aims complement those of the Science curriculum in KS1 and KS2.

2. Statutory requirements

This policy has been written in accordance with the statutory guidance document “Relationships and Sex Education (RSE) and Health Education” (DfE, 2019).

The teaching of Sex Education in Primary schools remains non-statutory, with the exception of the elements of sex education contained in the science national curriculum: including knowledge of the main external body parts, the changes as humans develop to old age and reproduction in some plants and animals. Other related topics that fall within the statutory requirements for Health Education, such as puberty and menstrual wellbeing, will be included within PSHE education lessons, when age appropriate.

Should you like to see the guidance from the UK government please visit: [Relationships Education, Relationships and Sex Education \(RSE\) and Health Education](#)

3. Definition

Within this policy, as in the DfE guidance, Relationships Education is defined as teaching about the fundamental building blocks and characteristics of positive relationships, with particular reference to respectful friendships, family relationships, and relationships with other children and with adults, including online.

For the purpose of this policy, Health Education is defined as teaching pupils about physical health and mental wellbeing, focusing on recognising the link between the two and being able to make healthy lifestyle choices.

4. Curriculum

4.1 Statutory RSE Curriculum Content

Our RSE curriculum is embedded within our PSHE curriculum and is set out as per Appendix 1. However, this will be adapted when necessary.

We have developed the curriculum taking into account the age, needs and feelings of pupils. If pupils ask questions outside the scope of this policy, teachers will respond in an age appropriate manner so they are fully informed and do not seek answers online.

Key objectives of the statutory Relationships Education curriculum are outlined below:

Families and people who care for me

Children should know:

- that families are important for children growing up because they can give love, security and stability.
- the characteristics of healthy family life, commitment to each other, including in times of difficulty, protection and care for children and other family members, the importance of spending time together and sharing each other's lives.
- that others' families, either in school or in the wider world, sometimes look different from their family, but that they should respect those differences and know that other children's families are also characterized by love and care.
- that stable, caring relationships, which may be of different types, are at the heart of happy families, and are important for children's security as they grow up.
- that marriage represents a formal and legally recognised commitment of two people to each other which is intended to be lifelong.
- how to recognise if family relationships are making them feel unhappy or unsafe, and how to seek help or advice from others if needed.

Caring friendships

Children should know:

- how important friendships are in making us feel happy and secure, and how people choose and make friends.
- the characteristics of friendships, including mutual respect, truthfulness, trustworthiness, loyalty, kindness, generosity, trust, sharing interests and experiences and support with problems and difficulties.
- that healthy friendships are positive and welcoming towards others, and do not make others feel lonely or excluded.
- that most friendships have ups and downs, and that these can often be worked through so that the friendship is repaired or even strengthened, and that resorting to physically or verbally aggressive behaviour is never right.
- how to recognise who to trust and who not to trust, how to judge when a friendship is making them feel unhappy or uncomfortable, managing conflict, how to manage these situations and how to seek help or advice from others, if needed.

Respectful relationships

Children should know:

- the importance of respecting others, even when they are very different from them (for example, physically, in character, personality or backgrounds), or make different choices or have different preferences or beliefs.
- practical steps they can take in a range of different contexts to improve or support respectful relationships.
- the conventions of courtesy and manners.

- the importance of self-respect and how this links to their own happiness.
- that in school, and in wider society, they can expect to be treated with respect by others, and that in turn they should show due respect to others, including those in positions of authority.
- about different types of bullying (including cyberbullying), the impact of bullying, responsibilities of bystanders (primarily reporting bullying to an adult) and how to get help.
- what a stereotype is, and how stereotypes can be unfair, negative or destructive.
- the importance of permission-seeking and granting in relationships with friends, peers and adults.

Online relationships/ Cyber Bullying

Children should know:

- that people sometimes behave differently online, including by pretending to be someone they are not.
- that the same principles apply to online relationships as to face-to-face relationships, including the importance of respect for others online, including when we are anonymous.
- the rules and principles for keeping safe online, how to recognise risks, harmful content and contact, and how to report them.
- how to critically consider their online friendships and sources of information, including awareness of the risks associated with people they have never met.
- how information and data is shared and used online.

Being safe

Children should know:

- what sorts of boundaries are appropriate in friendships with peers and others (including in a digital context).
- about the concept of privacy and the implications of it for both children and adults, including that it is not always right to keep secrets if they relate to being safe.
- that each person's body belongs to them, and the differences between appropriate and inappropriate or unsafe physical, and other, contact.
- how to respond safely and appropriately to adults they may encounter (in all contexts, including online) whom they do not know.
- how to recognise and report feelings of being unsafe or feeling bad about any adult and others.
- how to ask for advice or help for themselves or others, and to keep trying until they are heard.
- how to report concerns or abuse, and the vocabulary and confidence needed to do so.
- where to get advice e.g. family, school and/or other sources.

These areas of learning are taught within the context of family life, taking care to ensure that there is no stigmatization of children based on their home circumstances (families can

include single parent families, LGBT parents, families headed by grandparents, adoptive parents, foster parents/carers amongst other structures) along with reflecting sensitively that some children may have a different structure of support around them.

4.2 Statutory Science Curriculum Content

Early Years Foundation Stage children learn about life cycles, as well as watching chicks hatch. Through ongoing personal, social and emotional development, they develop the skills to form relationships and think about relationships with others.

In Key Stage 1 (Year 1 – Year 2) children learn:

- To identify, name, draw and label the basic parts of the human body and say which part of the body is to do with each sense.
- To notice that animals, including humans, have offspring which grow into adults.
- To find out about and describe the basic needs of animals, including humans, for survival (water, food and air).
- To describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene.

In Key Stage 2 (Year 3 to Year 6) children learn:

- To identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food. They get nutrition from what they eat.
- To identify that humans and some other animals have skeletons and muscles for support, protection and movement.
- To describe the simple functions of the basic parts of the digestive system in humans.
- To identify the different types of teeth in humans and their simple functions.
- To describe the life process of reproduction in some plants and animals.
- To describe the changes, as humans develop to old age.
- To identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood.
- To recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function.
- To describe the way nutrients and water are transported within animals, including humans.
- To recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.

4.3 Non-Statutory Sex Education

As part of statutory Health Education, children are taught, in an age appropriate way,

about puberty and the associated physical and emotional changes from Year 4 onwards. As part of the science curriculum, children learn in Year 2 that animals, including humans, have offspring which grow into adults. In Year 5, they describe the changes as humans develop to old age and about how reproduction occurs in some plants and animals.

Alongside this, children in Year 4 are taught to recognise the signs and changes that may occur during the onset of puberty, in preparation for further lessons on this subject which also focus on emotional changes and menstruation. These lessons form part of the statutory requirements for Health Education.

5. Delivery of RSE

Our Relationships and Sex Education programme will be delivered in an age appropriate and sensitive manner by class teachers.

6. Roles and responsibilities

6.1 The Headteacher

The Headteacher is responsible for ensuring that RSE is taught consistently across the school, and for managing requests to withdraw pupils from non-statutory components of RSE.

Class teachers are responsible for teaching RSE at Newton. They will be supported by the school psychologists, who are available to speak to children if requested.

Teachers will reply to, and answer, children's questions sensitively and openly. They will ensure that balanced information is provided, which will take into account the different faiths' views and avoid any negative impressions.

6.2 Pupils

Pupils are expected to engage fully in RSE and, when discussing issues related to RSE, treat others with respect and sensitivity.

6.3 Parents

The school is well aware that the primary role in children's RSE lies with parents and carers. We wish to build a positive and supporting relationship with the parents of children

at our school through mutual understanding, trust and cooperation. In promoting this objective, we:

- Inform parents about the school's RSE policy and practice. This includes informing parents by letter or email before beginning to teach a unit of RSE.
- Answer any questions that parents may have about the RSE of their child. This includes providing opportunities for parents to view the resources that are used in lessons.
- Acknowledge parents have the right to withdraw their children from the non-statutory components of sex education within RSE. However, this rarely happens as, by working in partnership with parents, they recognise the importance of this aspect of their child's education.
- Keep a register of any pupils who are removed from lessons and distributed to all teachers involved.

7. Parents' right to withdraw

As previously stated, the RSE curriculum consists of both statutory and non-statutory elements:

- Parents do have the right to withdraw their children from the non-statutory/non-science components of sex education within RSE.
- Parents do not have the right to withdraw their children from statutory relationships education, health education or the science curriculum.

Parents wanting to withdraw their children are invited to speak to the class teacher and school psychologists. The class teacher will explore the concern of the parents and the possibility of adjusting the programme or approach, and will discuss any impact that withdrawal may have on the child. He/she will talk with the parents about the possible negative experiences or feelings that may result from withdrawal of the child and the ways in which these may be minimized. If the parent still wishes to withdraw the child, requests for withdrawal should be put in writing and addressed to the Headteacher.

Alternative work will be given to pupils who are withdrawn from sex education and those children will go to another class for the duration of the lesson.

8. Monitoring the Policy:

RSE teaching is monitored by the SLT through, for example, planning checks, learning walks and classroom visits.

Student development in RSE is monitored by teachers as part of our internal assessment systems.
